

This report is written to clarify the discrepancy identified in your letter dated April 20, 2010 re: "a substantial increase in the amount of disbursements from those disclosed on your original report."

The discrepancy was found by our campaign committee and brought to the FEC's attention immediately, thus amended instantly. Each accounting month is reconciled on a quarterly basis, typically in due time for the FEC Quarterly reports. Since the pre-primary report is due in the middle of February, rather than quarter-end, the discrepancy went unnoticed during the initial filing, and was inadvertently overlooked in our accounting software. As mentioned, our campaign committee immediately took action by notifying the FEC of this error, thus filing the amendment directly after.
